EMBER THREAT

Structure Ignition

Embers are the **#1** cause of structure ignition during wildfire events. **FireStorm® Building Products** offer home owners and communities a cost effective solution against these devastating attacks.

Protecting your home and your property from ember ignition is possible with certified building materials and a well managed defensible space!

Certified Defense

FireStorm® Building Products are tested to the highest standards, ensuring compliance with the latest wildfire requirements and WUI Building Codes.

FireStorm® Gutter Guards are tested to ASTM E-84 and carry a Class-A Rating for fire resistance, flammability, flame-spread, and fire reaction.

V2™ Vent, EmberMesh™, & EmberVent™ are tested to ASTM E-2886 to resist the entry of embers and flame penetration.

FireStorm® Gutter Guards are rated "Ignition Resistant" and tested to ASTM E-2768 (30min) for fire resistance, flammability, flame spread, and fire reaction.

Protect These Vulnerable Areas:

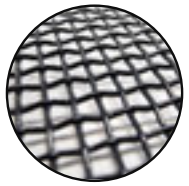

- Decks & Fence Lines
- Exterior Ventilation
- Crawlspaces
- Rain Gutters
- Eave Overhangs
- Attic and Garage

Insurance Discounts may be available. Check with your local agent for details!

FIRESTORM® BUILDING PRODUCTS EmberMesh™

Rapid wildfire defense against the heaviest ember attacks. **EmberMesh**™ effectively blocks embers from entering gaps and reflects radiant heat caused by fires. This essential product acts as a shield, protecting the vulnerable areas of your home.

Wildand Urban Interface

Living with wildfire is the new normal. If you live in or near the WUI, being prepared is a must. With the right building materials, proper defensible space, and community involvement, survivability becomes possible. FireStorm Building Products makes it affordable.

WILDFIRE PREPARED

FireStorm Building Products were designed give everyone a clear path to towards wildfire compliance. **IBHS's Wildfire Prepared Home**, **Fire Safe Councils**, **Firewise Communities** and **State agencies** are leading the way in wildfire mitigations education. It's our mission to making wildfire defense available to everyone with cost effective solutions.

FIRESTORM® BUILDING PRODUCTS EmberMesh™

Each **EmberVent** ™ is designed with **EmberMesh** ™ and comes ready to paint! No prep needed. Just measure, paint, and install! Our vents are IWUI compliant and Wildfire Prepared ready! Protect your crawlspaces, attics, roofs, eaves and soffits with our cost effective vents!

FIRESTORM® BUILDING PRODUCTS V2™ Vent

The newest addition to our product line now includes, the next generation of fire and ember safe vents! Built for extreme wildfire attacks, V2 Vent includes stainless steel mesh - front and back and our advanced intumescent V2 Matrix for heat and flame attacks.

V2 Matrix
(intumescent technology)

V2 Matrix

V2 Vent offers extreme defense using our latest and most advanced intumesent honeycomb matrix. Beyond ember attacks, **V2 Vents react to heat and flames**, and been tested horizontally and vertically to seal off and protect vulnerable openings during wildfire attacks.

FIRESTORM® BUILDING PRODUCTS Gutter Guards

FireStorm® Gutter Guards protect your home two ways: Our 30 min. ignition resistance rating holds up under fire, keeping embers and debris out of your gutters. These are major sources of ignition during wildfires. Our 3D micromesh design keeps water flowing away from your roofline, even during heavy downpours.
